DATABRICKS & AI/ML

Databricks Lakehouse Unity Catalog
Delta Live Tables LakeFlow Genie AI/BI
AgentBrick RAG / GenAI MLflow
Model Serving Auto Loader
Structured Streaming Databricks Apps
Asset Bundles Delta Lake dbt PySpark
Databricks SQL

CLOUD PLATFORMS

Azure Databricks ADLS Gen2
Azure Event Hubs Azure Key Vault
Azure DevOps ARM Templates AKS
AWS Databricks Amazon S3 / EC2
Amazon Bedrock AWS IAM
GCP Databricks GCS / BigQuery
Terraform

DEVOPS & PROGRAMMING

Python SQL / Spark SQL Docker
Kubernetes CI/CD Jenkins Ansible
Bash Grafana ELK Stack Prometheus

EDUCATION

B.Tech — Electronics & Communication Engineering
Pondicherry University
2004 – 2007 · Pondicherry, India

Abishek Subramanian

Data & AI Solution Architect | Databricks Technologies & Delivery

PROFESSIONAL SUMMARY

Data and AI leader with **18+ years** of enterprise experience helping global organisations turn fragmented data estates into governed, AI-ready lakehouse platforms — at petabyte scale, across clouds, and at speed. Currently leading one of the most complex Azure-to-GCP Databricks migrations in the region for a global retail enterprise. Previously at Databricks for **nearly 4 years**, partnering with Fortune 500 clients to architect and operationalize high-impact data and AI platforms. Deep expertise across the full Databricks stack — Unity Catalog, LakeFlow, GenAI, Delta Live Tables — and multi-cloud delivery on Azure, AWS, and GCP.

18+ Years Experience	5+ Years in Databricks	15+ Team Size Led	70+ TB Data Migrated	20%+ Efficiency Gains
--------------------------------	----------------------------------	-----------------------------	--------------------------------	---------------------------------

PROFESSIONAL EXPERIENCE

Associate Director — Databricks Technologies & Delivery

Feb 2026 – Present

Wavicle Data Solutions

Bengaluru, India

- Lead the **Databricks CoE (Center of Excellence)** — defining lakehouse architecture standards, governance frameworks, and delivery best practices across enterprise engagements
- Architecting a **petabyte-scale Azure-to-GCP Databricks lakehouse migration** for a global retail group — 70+ TB moved through a phased, fully automated, zero-downtime program
- Designed a **six-step automated migration framework**: asset classification → config mapping → JSON transform → dependency-ordered deployment → REST-API deployment → validation
- Built custom **Asset Migrator & Asset Validator** frameworks for governed, error-free cross-cloud migration of clusters, jobs, pipelines, secrets, libraries, and policies
- Implemented **Unity Catalog governance** on target platform — preserving access controls, data lineage, and audit logs throughout the migration lifecycle
- Lead a distributed offshore/onsite engineering team, owning solution architecture, technical mentoring, and senior stakeholder management

Senior Solution Engineer

May 2022 – Feb 2026

Databricks India Pvt. Ltd.

Bengaluru, India

- Established **Databricks Asset Bundle (DAB)** deployment best practices — reducing development cycles and infrastructure costs for enterprise customers
- Developed implementation guidelines for **GenAI using RAG architecture** (Genie AI/BI, AgentBrick), enabling product teams to adopt GenAI at enterprise scale
- Architected production-grade pipelines with **Delta Live Tables + dbt** — medallion architecture, data quality expectations, and automated Workflows orchestration
- Designed a **custom AI Bot Space** on Databricks Apps, integrating Unity Catalog and custom models into a secure, governed enterprise AI tool
- Built **ML lifecycle platforms** with MLflow — experiment tracking, model registry, REST-based Model Serving; resolved critical ML workload blockers for enterprise clients
- Optimised **platform costs via system tables** — DBU tracking, cluster utilisation analysis, and autoscaling policy enforcement across teams

Databricks

Data Engineering Associate · Platform Administrator · Generative AI Fundamentals · Lakehouse Fundamentals

Microsoft Azure

Solutions Architect Expert · DevOps Engineer Expert · Administrator Associate · Identity & Access Administrator

AWS

Solutions Architect Professional · Solutions Architect Associate · AWS Community Builder

Oracle

VM 3.0 Implementation Specialist · Cloud Infrastructure Classic Associate Architect

Others

Red Hat Certified Engineer (RHCE) · VMware VCP-DCV · Citrix XenServer Administration · ITIL V3

SPEAKING & COMMUNITY

- ▶ **Founder & Lead** — Databricks User Group India (India's largest; 6 cities: Bangalore, Hyderabad, Pune, Coimbatore, Kolkata, Chennai)
- ▶ **Creator** — #LearnWithAbi (Databricks & GenAI content on LinkedIn, Medium, GitHub)
- ▶ **Speaker** — DATA+AI Summit Recap: *Databricks & Apache Iceberg*
- ▶ **Speaker** — 9th World ML Summit: *"Unlocking MLOps Potential"*
- ▶ **Speaker** — ServerlessDays Bengaluru: *Databricks Serverless SQL*
- ▶ **Speaker** — TechXConf 2024, Asia's largest AI & cloud conference
- ▶ **Session** — Nasdaq AWS Community: *Bedrock + Databricks Model Serving*
- ▶ **Workshops** at PSG Tech, Adamas University & MITS
- ▶ **Nominated** — Topmate Creator Awards 2024

PROFESSIONAL EXPERIENCE (CONTINUED)

Principal Software Engineer

Aug 2021 – May 2022

Oracle India Pvt. Ltd.

- ▶ Onboarded Oracle Cloud Fusion (SaaS) enterprise customers — solution proposals, implementation, and cross-stakeholder coordination
- ▶ Defined migration strategy from on-premises to **Oracle Cloud Infrastructure (OCI)** for SaaS and IaaS workloads; drove critical escalations to resolution

System Integration Specialist Advisor

May 2018 – Aug 2021

NTT Data

- ▶ Designed scalable, secure multi-cloud architectures across **Azure, AWS, and VMware**; led legacy-to-cloud-native modernisation projects
- ▶ Built IaC automation frameworks using **Terraform, Ansible, and Jenkins**; established cloud governance, security, and compliance standards

EARLIER CAREER

Senior Software Engineer — Oracle India · Led Cloud Central team for SaaS Fusion post-provision assessments	Jul 2015 – May 2018
Cloud Engineer — Citrix R&D India · XenApp, XenDesktop, NetScaler & StoreFront enterprise deployments	Jun 2013 – Jul 2015
System Engineer — CSS Corp · Global Red Hat / XEN / VMware server administration	Jun 2011 – Jun 2013
Software Engineer (Contract) — Wipro Technologies · UNIX batch ops, HPSM/HPOM automation, production support	Sep 2010 – Jun 2011

KEY PROJECTS

Petabyte-Scale Azure-to-GCP Lakehouse Migration

70+ TB zero-downtime migration for a global retail enterprise with full Unity Catalog governance and six-step automated Asset Migrator & Validator framework.

Delta Live Tables + dbt Enterprise Pipeline

Medallion architecture pipelines with data quality expectations and automated Workflows orchestration for enterprise ELT at scale.

Amazon Bedrock + Databricks Model Serving

Integration between Bedrock foundation models and Databricks Model Serving endpoints, demonstrated at Nasdaq AWS Community.

GenAI RAG AI Bot Space on Databricks Apps

Enterprise AI Bot Space using RAG, Unity Catalog-managed models, and MLflow for secure, governed GenAI workflows at scale.

Databricks Platform Cost Optimisation

System-tables observability — DBU tracking, cluster utilisation analysis, and autoscaling policies delivering measurable spend reduction.

Multi-Cloud IaC Automation Framework

Terraform, Ansible & Jenkins-based automation across Azure, AWS, VMware — provisioning, CI/CD pipelines, and cloud governance at NTT Data.
